DETAILED ACTION

1. Applicant's election without traverse of claims 1-14 and 23-63 in Paper No. 10 is acknowledged.
2. A further restriction requirement is being made as follows.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 and 23-40, drawn to an electrochemical processing chamber, classified in class 204, subclass 230.2.
 - II. Claims 41-63, drawn to apparatus, classified in class 118, subclass 423 or 429.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions do not each require a weir, robot, concentric anodes or electrical contacts.
5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Mr. Steven D. Lawrenz, attorney of record, on November 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1742

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
